

Final Project Proposal

South Coast Track 2014

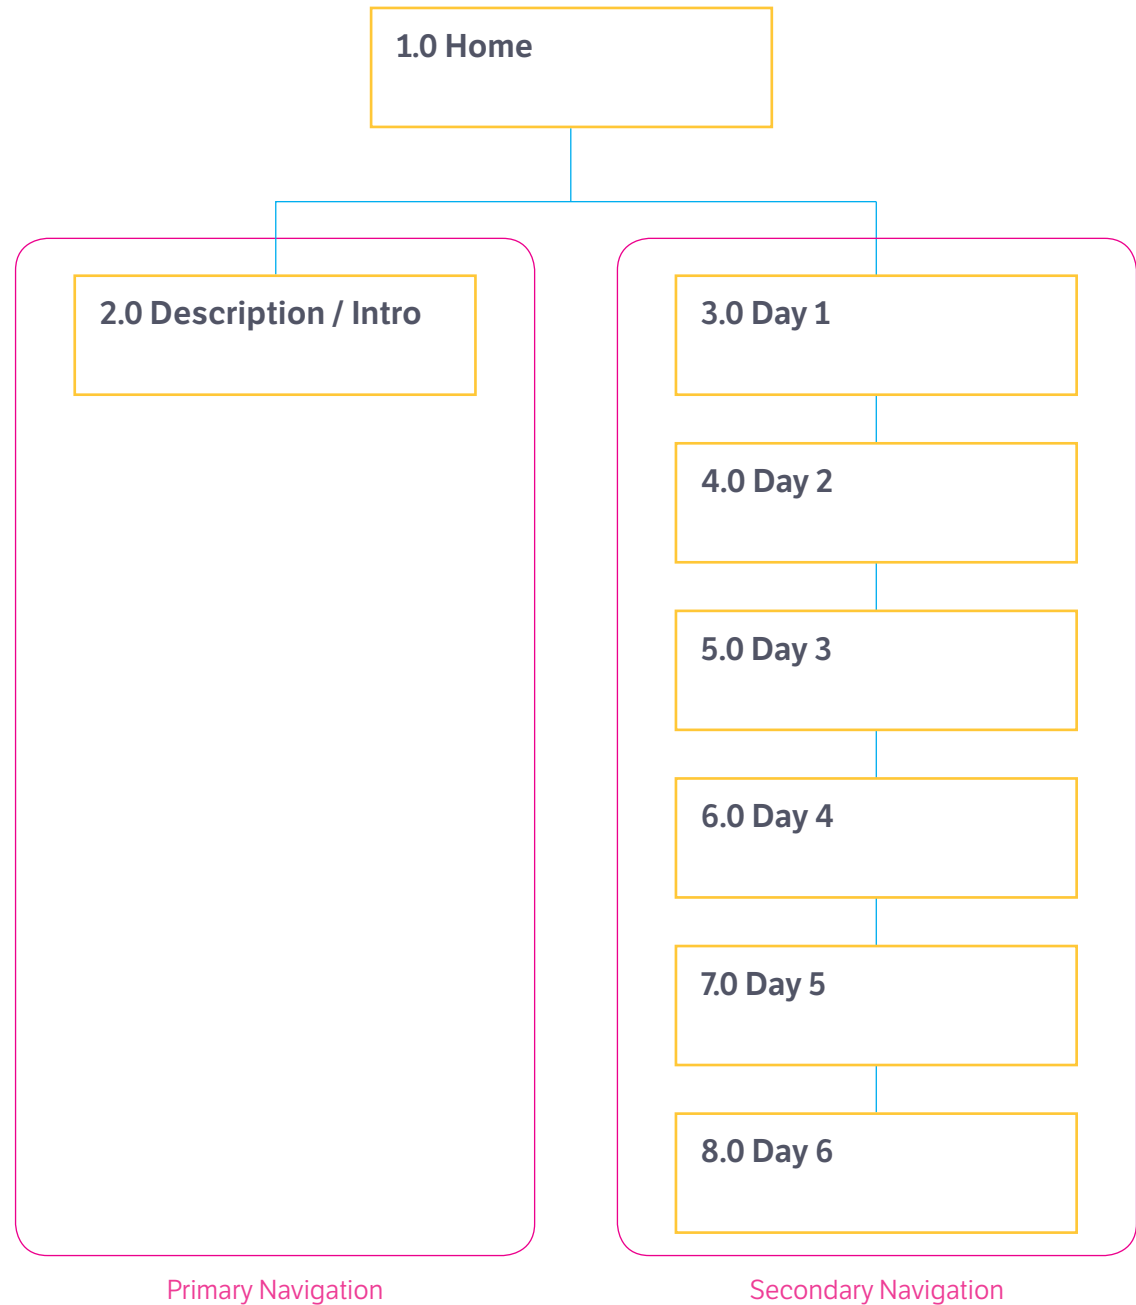

Gretchen Dobson

South Coast Track

A collection of resource of a five day exploit.
The website is to house images and video footage of the trip but the main aim is to reflect the story of the trip and the emotions encountered.
The website will do so by calling on design, layout and behavior.

The site will be divided by days and then broken down into additional factual information, repetitive for each day;

- _Location
- _Distance
- _Terrain / level of difficulty
- _Description
- _Image
